Considering the publication of **CAPES Ordinance No. 133**, dated July 10, 2023, which regulates the possibility of cumulating master's, doctoral, and postdoctoral scholarships (granted by CAPES) with paid activities or other incomes, we consider **Article 1** of CCPG **Normative Instruction No. 01/2023** for the allocation of scholarships.

Article 1. *The Graduate Program in Statistics, through its coordinator, may authorize the cumulation of CAPES master's and doctoral scholarships with other incomes, provided that there are no students in the program without scholarships or paid activities.*
